

On August 1, the Foreign Office said the retired Indian directive from the International Court of Justice.

is not something that is being conducted in dark corners of Pakistan. It's done in broad daylight," he was quoted as saying in the report. India has not been engaging with Pakistan since an attack on Pathankot Air Force base in January of 2016 by Pak-based terrorists, maintaining that talks and terror cannot go together.

Chandrayaan-2 lander separates successfully

Monday said the lander, after the separation, was located in an orbit of 119 km perigee (nearest point from moon) and 127 km apogee (farthest point from moon) in the moon's orbit. The Chandrayaan-2 lander, which has a mission life of one year, will continue to go around the Moon in its existing orbit. The ISRO said the health of the lander and Lander was being monitored from the Mission Operations Complex at ISRO's Telemetry, Tracking and Command Network (TTN) here with support from Indian Space Network (ISN) antennas at Tirupur Bylalu. After the separation, two de-orbit manoeuvres of the lander to bring it further down will be carried out on September 4 and September 5 to prepare for its landing in the south polar region of the moon, where no country has gone so far. The first of the manoeuvres was scheduled on Tuesday between 8.45 am and 9.45 am IST, the ISRO said. Vikram, named after the father of India's

space research programme Vikram Sarabhai, is scheduled to land on the lunar surface near its south pole on September 7 at about 1.55 am. The exact landing site free of hazards will be decided based on pictures of the area captured and sent back by the lander's onboard camera.

A successful mission will make India the fourth country after Russia, the US and China to pull off a soft landing on the moon.

Rover Pragyaan, a six-wheeled robotic vehicle, will then roll out from the lander to carry out various tests on the lunar soil, especially detecting the presence of water and other mineral there, during its mission life of one Lunar day, equal to 14 Earth days.

Sivan earlier said the soft landing on the Moon will be a "terrifying" moment as it is something the has not done before, whereas the Lunar Orbit Insertion manoeuvre was successfully carried out during the earlier Chandrayaan-1 mission.

Varthaman flies MiG 21 jet with IAF chief

Varthaman was released on the night of September 1 by Pakistan. He was taken off flying duties because of his injuries. The IAF chief said he, too, ejected from a MiG 21 jet in 1988 and had to wait for nine months to return to the fighter cockpit. Varthaman has got back his flying category in less than six months which is a record, said Dhanoa, adding it was his last flight on a fighter jet before retirement.

"Both of us ejected and both of us fought the Pakistanis," he added.

Varthaman returned to the fighter cockpit around two weeks ago after IAF's Bengaluru-based Institute of Aerospace Medicine gave him the go-ahead to fly again following a thorough medical evaluation.

As a young pilot, the Air Force chief flew the MiG 21 jet with Varthaman senior, Simhakutty Varthaman, who retired as Air Marshal.

UN summit to combat desertification begins

Global impact. Here, in degradation, the problem becomes local and solutions have to be found locally. But international experience can be shared to help various countries. "If we take mitigation action on climate change, world will be a better place. We are sure of good outcomes from the COP," Thawar said.

Abraham Thiaw, Executive Secretary, UNCCD, said this conference is going to be the best ever with nearly 8,000 registered participants. "This is the largest ever COP organized by UNCCD. We are really excited as it

is the 25th anniversary of UNCCD.

"Land feeds people: It is extremely important to keep feeding the world but what to do to keep doing so. Unfortunately we have degraded 25 per cent of land globally which is unusable. Using the human intelligence and technology we must restore the land," Thiaw said.

The COP will go on till September 13 during which the ministers are expected to announce their targets for land restoration and agree on measures to address the related emerging threats of forced migration.
